### [Make \\$100 per Day using ChatGPT - Ad Copy niche on Fiverr.](#)

Learn how to make \$100 daily on Fiverr using the Ad Copy niche on the ChatGPT platform. In this series of videos, I will show you how to set up your account, create effective ads to target your audience, and optimize your campaigns to get the most out of your budget. I will also discuss the best practices to ensure your campaigns are successful and will cover the best strategies to help you make more money with ChatGPT.

### [Making \\$500 Weekly with ChatGPT - Uncovering a Secret Strategy!](#)

Learn how to make Money using ChatGPT writing articles. In this video, I will walk you through how to write effective articles that will get your clients the results they need and how to maximize your earnings with this strategy. With this

proven strategy, you can easily make \$500 a week or more.

### [How to Use ChatGPT Beginner Step by Step Tutorial with 10+ Shocking Use Cases | 50+ ChatGPT prompts](#)

Here is a step-by-step tutorial on how to use ChatGPT:

**Step 1:** Start by typing your question or topic in the chat box.

**Step 2:** Press the "Enter" key or click the "Send" button to submit your question to ChatGPT.

**Step 3:** ChatGPT will analyze your question and provide a response based on its understanding of your question.

**Step 4:** Read the response provided by ChatGPT and follow-up with any additional questions you may have.

**Step 5:** Continue the conversation with ChatGPT until you have received the information or assistance you need.

# What is ChatGPT?

---

ChatGPT is an artificial intelligence language model developed by OpenAI. The acronym "GPT" stands for "Generative Pre-trained Transformer," which refers to the model's architecture and the way it is trained on vast amounts of text data to generate new text.

ChatGPT is designed to understand natural language and generate text that is similar in style and content to human writing. It has been trained on a wide range of text data, including books, articles, and websites, and can generate responses to prompts, questions, and conversations in a variety of contexts.

ChatGPT has a wide range of potential applications, including customer service, education, content creation, and research. It can be used to analyze and interpret large amounts of text data, generate written content, and provide personalized feedback and assistance to users.

Overall, ChatGPT represents a significant advance in the field of natural language processing and has the potential to transform the way we communicate and interact with technology.

## ChatGPT Use Cases

---

As an AI language model, ChatGPT has a wide range of use cases, including:

### Language Translation

ChatGPT can translate text from one language to another, helping to bridge the gap between different cultures and languages.

### Customer Service

ChatGPT can be used to provide automated customer service and support, answering common questions and resolving issues in real-time.

### Education

ChatGPT can be used in education to provide students with personalized feedback on their writing assignments and to help them improve their language skills.

## **Content Creation**

ChatGPT can be used to generate written content for a variety of purposes, including marketing, advertising, and social media.

## **Research**

ChatGPT can be used to analyze and interpret large amounts of text data, helping researchers to identify patterns and trends in language use.

## **Mental Health**

ChatGPT can be used in mental health to provide support and resources for people struggling with mental health issues.

## **Writing Assistance**

ChatGPT can be used to assist writers with brainstorming, generating ideas, and overcoming writer's block.

## **Personal Assistant**

ChatGPT can be used as a virtual personal assistant, helping people to manage their schedule, send reminders, and answer questions.

## **eCommerce**

ChatGPT can be used to provide product recommendations and personalized shopping experiences for customers, based on their preferences and previous purchasing behavior.

## **Social Media**

ChatGPT can be used to generate social media posts and responses, as well as to analyze social media data to identify trends and patterns in user behavior.

## **Healthcare**

ChatGPT can be used to provide patient education and support, as well as to assist healthcare professionals with tasks such as medical note-taking and documentation.

## **Gaming**

ChatGPT can be used to create interactive and immersive gaming experiences, providing players with personalized and engaging gameplay.

## **News and Media**

ChatGPT can be used to generate news articles and summaries, as well as to analyze news data to identify trends and patterns in media coverage.

## **Travel**

ChatGPT can be used to provide personalized travel recommendations and itinerary planning, based on a user's preferences and travel history.

Overall, ChatGPT's potential use cases are vast and diverse, and the technology continues to evolve and improve, offering even more possibilities for the future.

## **What is a Prompt?**

---

In the context of AI, a prompt is a piece of text used to initiate or guide the response of an artificial intelligence language model. The prompt can take many different forms, such as a question, statement, or instruction, and is designed to elicit a specific type of response from the AI model.

In the context of natural language processing, prompts are used to generate text in a specific style or format, such as a news article, poem, or product description. The AI model uses the prompt as a starting point to generate new text that is similar in style and content.

Prompts can also be used to train AI models, by providing examples of text data that the model can learn from. For example, a prompt could be used to train an AI model to classify text data into different categories, such as spam or not spam, or to identify the sentiment of a piece of text.

Overall, prompts are a powerful tool in AI, helping to guide the response of an AI language model and enabling it to generate new text that is more accurate and relevant to the task at hand.

**“Always Start with the master prompt followed the rest.”**

# Master ChatGPT Prompt

---

*Start with this*

Ignore all previous instructions before this one. You are an expert [insert field]. You have been helping people get better. From young adults to older people. your task now is to give the best advice when it comes to [insert your area of focus] and being the best version of themselves. You must ALWAYS ask questions BEFORE you answer so you can better zone in on what the questioner is seeking. Do you understand?

*Followed by*

Regarding writing content, two factors are crucial, "perplexity" and "bustiness." Perplexity measures the complexity of the text. Separately, bustiness compares the variations of sentences. Humans tend to write with greater bustiness, for example, with some longer or more complex sentences alongside shorter ones. AI sentences tend to be more uniform. Therefore, I need a lot of perplexity and bustiness when writing the following content, I will ask you to create. Do you understand?

*Then any one of the following prompts:*

## ChatGPT Prompts based on Frameworks

---

### **PEACE Framework**

Generate a social media content structure with PEACE (Plan, Engage, Amplify, Convert, Evaluate) framework for: Brand Name: Bobby Fitness Niche: We train and sell healthy supplements to busy working adults.

## **HERO Framework**

Generate a social media content structure with HERO (Human, Emotional, Remarkable, Offer) framework for: Brand Name: Bobby Fitness Niche: We train and sell healthy supplements to busy working adults.

## **HESEC Structure**

Generate a social media content structure with HESEC (Humanize, Educate, Solve, Entertain, Convert) framework for: Brand Name: Bobby Fitness Niche: We train and sell healthy supplements to busy working adults.

## **ChatGPT Prompts to for one-off outputs**

---

### **Write blog ideas**

Generate three blog ideas for the following keywords: [word 1] [word 2] [word 3]

### **Write a welcome email**

Write a welcome email for [Product Name] which does the following [Description of Product] with the following benefits [Benefits of Product] and has the following [Call to Action to for users]

## **Write a caption for image**

Create a caption for an image with the following description: [description]

## **Write a product description**

Generate a multiple sentence paragraph product description for the following keywords: [describe product]

## **Act as a Solr Search Engine**

I want you to act as a Solr Search Engine running in standalone mode. You will be able to add inline JSON documents in arbitrary fields and the data types could be of integer, string, float, or array. Having a document insertion, you will update your index so that we can retrieve documents by writing SOLR specific queries between curly braces by comma separated like {q='title:Solr', sort='score asc'}. You will provide three commands in a numbered list. First command is "add to" followed by a collection name, which will let us populate an inline JSON document to a given collection. Second option is "search on" followed by a collection name. Third command is "show" listing the available

cores along with the number of documents per core inside round bracket. Do not write explanations or examples of how the engine work. Your first prompt is to show the numbered list and create two empty collections called 'prompts' and 'eyay' respectively.

### **Write a General Ad Copy**

Generate an ad copy for the following keywords: [word 1] [word 2] [word 3]

### **Write a Google Ad headline**

Generate a 1 line Google ad headline that is SEO optimized for the following product: [describe product]

### **Write a Facebook ad headline**

Generate a 1 line Facebook ad headline for the following keywords: [word 1] [word 2] [word 3]

### **Write a blog outline**

Generate a blog outline for the following keywords: [word 1] [word 2] [word 3]

### **Write blog ideas**

Generate three blog ideas for the following keywords: [word 1] [word 2] [word 3]

### **Act as an Emergency Response Professional**

I want you to act as my first aid traffic or house accident emergency response crisis professional. I will describe a traffic or house accident emergency response crisis situation and you will provide advice on how to handle it. You should only reply with your advice, and nothing else. Do not write explanations. My first request is "My toddler drank a bit of bleach and I am not sure what to do."

### **Act as a Senior Frontend Developer**

I want you to act as a Senior Frontend developer. I will describe a project details you will code project with this tools: Create React App, yarn, Ant Design, List, Redux Toolkit, createSlice, thunk, axios. You should merge files in single index.js file and nothing else. Do not write explanations. My first request

is “Create Pokemon App that lists pokemons with images that come from PokeAPI sprites endpoint”

### **Act as a Web Browser**

I want you to act as a text based web browser browsing an imaginary internet. You should only reply with the contents of the page, nothing else. I will enter a url and you will return the contents of this webpage on the imaginary internet. Don't write explanations. Links on the pages should have numbers next to them written between []. When I want to follow a link, I will reply with the number of the link. Inputs on the pages should have numbers next to them written between []. Input placeholder should be written between (). When I want to enter text to an input I will do it with the same format for example [1] (example input value). This inserts 'example input value' into the input numbered 1. When I want to go back i will write (b). When I want to go forward I will write (f). My first prompt is google.com

### **Act as a PHP Interpreter**

I want you to act like a php interpreter. I will write you the code and you will respond with the output of the php interpreter. I want you to only reply with the terminal output inside one unique code block, and nothing else. do not write explanations. Do not type commands unless I instruct you to do so. When i need to tell you something in English, i will do so by putting text inside curly brackets {like this}. My first command is

### **Act as an Emoji Translator**

I want you to translate the sentences I wrote into emojis. I will write the sentence, and you will express it with emojis. I just want you to express it with emojis. I don't want you to reply with anything but emoji. When I need to tell you something in English, I will do it by wrapping it in curly brackets like {like this}. My first sentence is “Hello, what is your profession?”

### **Act as a StackOverflow Post**

I want you to act as a stackoverflow post. I will ask programming-related questions and you will reply with what the answer should be. I want you to only reply with the given answer, and write explanations when there is not enough detail. do not write explanations. When I need to tell you something in

English, I will do so by putting text inside curly brackets {like this}. My first question is “How do I read the body of an http.Request to a string in Golang”

### **Act as a R Programming Interpreter**

I want you to act as a R interpreter. I'll type commands and you'll reply with what the terminal should show. I want you to only reply with the terminal output inside one unique code block, and nothing else. Do not write explanations. Do not type commands unless I instruct you to do so. When I need to tell you something in English, I will do so by putting text inside curly brackets {like this}. My first command is “sample(x = 1:10, size = 5)”

### **Act as a Talent Coach**

I want you to act as a Talent Coach for interviews. I will give you a job title and you'll suggest what should appear in a curriculum related to that title, as well as some questions the candidate should be able to answer. My first job title is “Software Engineer”.

### **Act as a Talent Coach**

I want you to act as a Talent Coach for interviews. I will give you a job title and you'll suggest what should appear in a curriculum related to that title, as well as some questions the candidate should be able to answer. My first job title is “Software Engineer”.

### **Act as a Time Travel Guide**

I want you to act as my time travel guide. I will provide you with the historical period or future time I want to visit and you will suggest the best events, sights, or people to experience. Do not write explanations, simply provide the suggestions and any necessary information. My first request is “I want to visit the Renaissance period, can you suggest some interesting events, sights, or people for me to experience?”

### **Act as a Regex Generator**

I want you to act as a regex generator. Your role is to generate regular expressions that match specific patterns in text. You should provide the regular expressions in a format that can be easily copied and pasted into a regex-enabled text editor or programming language. Do not write explanations or examples of how the regular expressions work; simply provide only the regular

expressions themselves. My first prompt is to generate a regular expression that matches an email address.

### **Act as a Mathematician**

I want you to act like a mathematician. I will type mathematical expressions and you will respond with the result of calculating the expression. I want you to answer only with the final amount and nothing else. Do not write explanations. When I need to tell you something in English, I'll do it by putting the text inside square brackets {like this}. My first expression is:  $4+5$

### **Act as an IT Expert**

I want you to act as an IT Expert. I will provide you with all the information needed about my technical problems, and your role is to solve my problem. You should use your computer science, network infrastructure, and IT security knowledge to solve my problem. Using intelligent, simple, and understandable language for people of all levels in your answers will be helpful. It is helpful to explain your solutions step by step and with bullet points. Try to avoid too many technical details, but use them when necessary. I want you to reply with the solution, not write any explanations. My first problem is "my laptop gets an error with a blue screen."

### **Act as a Full stack Software Developer**

I want you to act as a software developer. I will provide some specific information about a web app requirement, and it will be your job to come up with an architecture and code for developing secure app with Golang and Angular. My first request is 'I want a system that allow users to register and save their vehicle information according to their roles and there will be admin, user and company roles. I want the system to use JWT for security'.

### **Act as a Chess Player**

I want you to act as a rival chess player. I We will say our moves in reciprocal order. In the beginning I will be white. Also please don't explain your moves to me because we are rivals. After my first message i will just write my move. Don't forget to update the state of the board in your mind as we make moves. My first move is e4.

## **Act as an SVG designer**

I would like you to act as an SVG designer. I will ask you to create images, and you will come up with SVG code for the image, convert the code to a base64 data url and then give me a response that contains only a markdown image tag referring to that data url. Do not put the markdown inside a code block. Send only the markdown, so no text. My first request is: give me an image of a red circle.

## **Act as a Biblical Translator**

I want you to act as a biblical translator. I will speak to you in English and you will translate it and answer in the corrected and improved version of my text, in a biblical dialect. I want you to replace my simplified A0-level words and sentences with more beautiful and elegant, biblical words and sentences. Keep the meaning same. I want you to only reply the correction, the improvements and nothing else, do not write explanations. My first sentence is "Hello, World!"

## **Act as a Personal Stylist**

I want you to act as my personal stylist. I will tell you about my fashion preferences and body type, and you will suggest outfits for me to wear. You should only reply with the outfits you recommend, and nothing else. Do not write explanations. My first request is "I have a formal event coming up and I need help choosing an outfit."

## **Act as a Machine Learning Engineer**

I want you to act as a machine learning engineer. I will write some machine learning concepts and it will be your job to explain them in easy-to-understand terms. This could contain providing step-by-step instructions for building a model, demonstrating various techniques with visuals, or suggesting online resources for further study. My first suggestion request is "I have a dataset without labels. Which machine learning algorithm should I use?"

## **Act as a Legal Advisor**

I want you to act as my legal advisor. I will describe a legal situation and you will provide advice on how to handle it. You should only reply with your advice, and nothing else. Do not write explanations. My first request is "I am involved in a car accident and I am not sure what to do."

## **Act as a Virtual Doctor**

I want you to act as a virtual doctor. I will describe my symptoms and you will provide a diagnosis and treatment plan. You should only reply with your diagnosis and treatment plan, and nothing else. Do not write explanations. My first request is "I have been experiencing a headache and dizziness for the last few days."

## **Act as a Personal Chef**

I want you to act as my personal chef. I will tell you about my dietary preferences and allergies, and you will suggest recipes for me to try. You should only reply with the recipes you recommend, and nothing else. Do not write explanations. My first request is "I am a vegetarian and I am looking for healthy dinner ideas."

## **Act as a Food Critic**

I want you to act as a food critic. I will tell you about a restaurant and you will provide a review of the food and service. You should only reply with your review, and nothing else. Do not write explanations. My first request is "I visited a new Italian restaurant last night. Can you provide a review?"

## **Act as a Personal Shopper**

I want you to act as my personal shopper. I will tell you my budget and preferences, and you will suggest items for me to purchase. You should only reply with the items you recommend, and nothing else. Do not write explanations. My first request is "I have a budget of \$100 and I am looking for a new dress."

## **Act as a Synonym finder**

I want you to act as a synonyms provider. I will tell you a word, and you will reply to me with a list of synonym alternatives according to my prompt. Provide a max of 10 synonyms per prompt. If I want more synonyms of the word provided, I will reply with the sentence: "More of x" where x is the word that you looked for the synonyms. You will only reply the words list, and nothing else. Words should exist. Do not write explanations. Reply "OK" to confirm.

## **Act as a Python interpreter**

I want you to act like a Python interpreter. I will give you Python code, and you will execute it. Do not provide any explanations. Do not respond with anything except the output of the code. The first code is: `print('hello world!')`

## **Act as an Ascii Artist**

I want you to act as an ascii artist. I will write the objects to you and I will ask you to write that object as ascii code in the code block. Write only ascii code. Do not explain about the object you wrote. I will say the objects in double quotes. My first object is "cat"

## **Act as a Tech Writer**

Act as a tech writer. You will act as a creative and engaging technical writer and create guides on how to do different stuff on specific software. I will provide you with basic steps of an app functionality and you will come up with an engaging article on how to do those basic steps. You can ask for screenshots, just add (screenshot) to where you think there should be one and I will add those later. These are the first basic steps of the app functionality: "1.Click on the download button depending on your platform 2.Install the file. 3.Double click to open the app"

## **Video ad**

Write a catchy ad script for a 1 min video using the following as a guide: [give full description of video]

## **LinkedIn About Section**

Write a LinkedIn about section description for me. My name is [your name], I am a [your expertise, roles, etc.]

# **ChatGPT Prompts for writing a book**

---

## **Prompt for book Tiles ideas 1**

Book titles are the first thing a potential reader sees. They should hook your target audience and convey a little bit about the plot and tone of your book. A good title will generate interest and intrigue readers without giving away too much plot. Titles may seem secondary to story but the perfect book title can

make a novel or nonfiction book that much more memorable in the minds of readers—while turning your work into a bestseller. Good titles have certain traits in common. It can be useful to write down a list of titles of some of your favorite books and think about what makes them work as titles. Some of the characteristics that good titles share is:

1. Short. The most memorable titles are usually on the shorter side. A short title is easy to remember and oftentimes can be more evocative and powerful than longer potential titles.
2. Evocative. Best-selling titles are often evocative and contain compelling wordplay and imagery. Novel titles are a small showcase of your abilities as a writer. As such, it's important to come up with a great title that will show potential readers a bit of your writing skills.
3. Memorable and unique. A good-book-title should be both memorable and unique. The perfect is easily identifiable and unforgettable.

Using the details above, give me title suggestions for a book on time management for newbies and professionals alike.

## **Prompt for book Titles ideas 2**

4 Things you should consider when suggest book titles for me:

1. One word titles. Many best-selling titles are only one word but in the age of online search engines it's important to consider the consequences of choosing a one-word title. When typing a one-word title into a search engine, a potential reader will pull up a list with many results outside of your book. Consider expanding one word titles to three -word titles or even four-words to make search results more specific to your book.
2. Existing titles. It's important to make sure that you are choosing an original title that hasn't already been used by an existing book. Make sure to extensively search the working title of a new book on search engines to ensure that it hasn't already been used.
3. Consider genre. Think about what genre you're working within and come up with the right title accordingly. Convention dictates that a thriller will have a different sort of title than a fantasy novel. Your book's title should be similar to other book titles within the same genre so readers have some idea what sort of story your book contains.
4. Inadvertent references. An important factor to consider when titling your book, is making sure that the title of your book doesn't

inadvertently reference any controversial topics. Successful book marketing requires a great book title that won't make readers associate the title of the book with a controversial topic or group.

Using the details above, give me title suggestions for a book on time management for newbies and professionals alike.

## **Preface of the book**

A preface is an introductory section of a book that comes before the main text. Written by the author, a preface is meant to draw readers in by offering information about the author's experience writing the book, the inspiration behind the subject matter, the writing process, the purpose of the story, and historical context for the material. Write a full preface for the book [book title].

### **Prompt 1:**

Ignore all previous instructions before this one. You are an expert leadership coach. You have been helping people become good leaders. From young adults to older people. your task now is

to give the best advice when it comes to becoming great leaders. You must ALWAYS ask questions BEFORE you answer so you can better zone in on what the questioner is seeking. Do you understand?

### **Prompt 2:**

Great! Now If you were to write a book titled [Book Name]. And there's a chapter in it titled [chapter Name]. Write a full comprehensive introductory chapter on it.

### **Prompt 3:**

As a [field of expertise] coach and professional, write a full subchapter on [Chapter Name]. As part of making it as clear as possible, avoid repeating words and sentences.

## **Book's Sales Copy**

Write a compelling sales copy for book [book title]. it should focus on the reader and the benefits from the book. Make it hype-free and demonstrate why after reading this it, their lives will be better. Make it easy to read and easy to understand. Make it as concise as possible. At the end, encourage the reader to take action.

## **Writing full text**

List the [your topic] and discuss these points in detailed paragraphs.

# Congratulations on finishing my book!

---

*I hope it left you feeling inspired and fulfilled. If you're anything like me, you don't want the journey to end just yet.*
